

NAPOLEON

9700 SERIES GAS FURNACES

9700 SERIES GAS FURNACES
napoleon.com

HEATING AND COOLING YOUR HOME. WITH NAPOLEON PERFORMANCE, IT'S SIMPLE.

The perfect combination of form and function, the Napoleon Ultimate 9700 Series Gas Furnace takes style and performance to a whole new level. Thanks to its powerful two-stage system, the Ultimate 9700 Series delivers comfortable temperatures how you want it, when you want it. For ideal comfort and maximum efficiency, the low-fire stage will deliver heat, drastically reducing electricity consumption. On colder days, it supplies a welcome wave of heat for consistent comfort with the high-fire, second stage.

The WHISPER QUIET™ operation of the motor employs a 'soft start' and 'soft stop' which gradually increases and decreases speed, quietly introducing air and reducing noise. The fully-insulated cabinet further reduces sound transfer. And with automatic internal LED lights and a modular design, maintenance and service have never been easier. With the reliable heat and comfort that Napoleon Ultimate 9700 Series Gas Furnace delivers, the weather outside no longer matters.

ASK FOR YEAR-ROUND COMFORT. ASK FOR NAPOLEON.

9700 SERIES GAS FURNACES

IMPROVE YOUR INDOOR LIVING QUALITY WITH NAPOLEON.

HVAC is more than mere heating and cooling. Napoleon's Heating & Cooling products take your comfort to the next level. Create a fresher, healthier, more comfortable environment that the whole family can enjoy.

WHISPER QUIET™
NO LOUDER THAN A WHISPER

WIFI CAPABLE

FEATURES

- Up to 97% AFUE
- WHISPER QUIET™ Operation
- Flexfit - Upflow, Right, Left
- The only furnace with an ultra violet light air purifier
- Patented SureView™ burner system window
- Variable Speed Motor
- Patented Vortex™ Technology
- Manufactured for Natural Gas
- (Propane conversion kit is available)

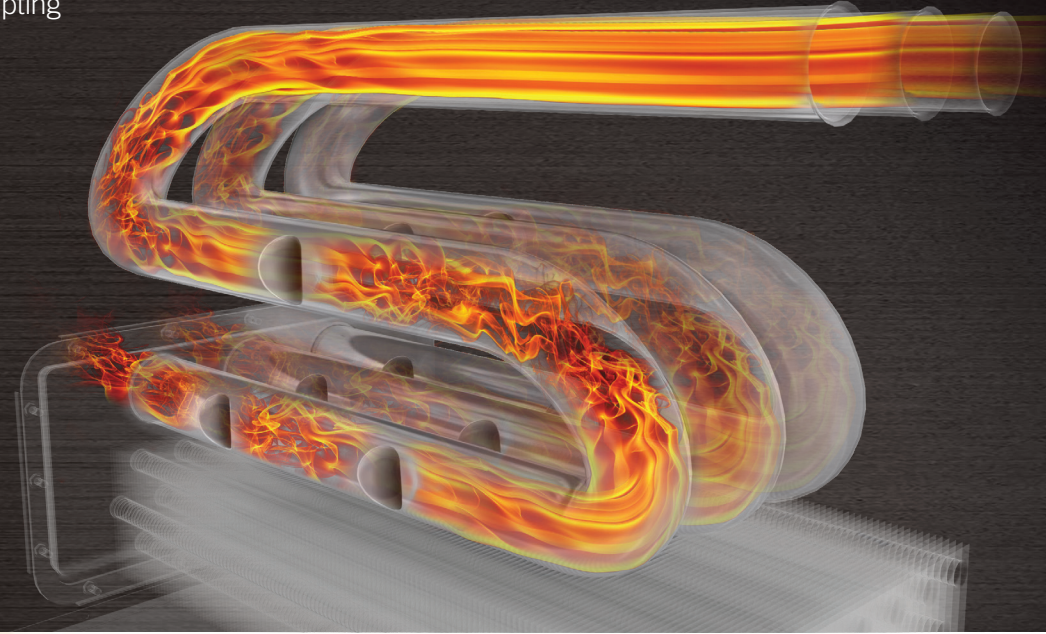

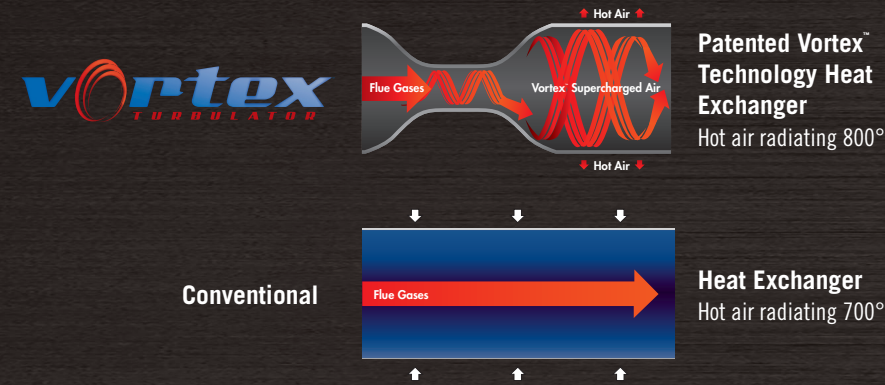

SUREVIEW™ BURNER SYSTEM

A first in the industry. See your furnace working with our patented SureView™ burner system window providing a unique view of the flames in operation.

PATENTED VORTEX™ TECHNOLOGY.

Vortex™ turbulator inside the heat exchanger increases efficiency by disrupting the natural airflow which extracts the maximum heat from the flue gases.

THINK DIFFERENT. THINK NAPOLEON.

BUILT TO LAST

OUR DIFFERENCE IS IN THE DETAILS.

- Commercial grade stainless steel tubular triple-pass heat exchanger
- Stainless steel heat recovery coil
- Aluminized multi-port in shot burners
- Two-stage gas valve
- Self diagnostic integrated furnace control (IFC)
- Durable sound reducing insulated cabinet
- Premium kyocera igniter
- Led lights onboard for easy viewing
- Self diagnostic integrated furnace control
- Natural gas with propane conversion kit available
- Factory tested

IT LOOKS DIFFERENT BECAUSE IT IS DIFFERENT.

In an otherwise stagnant field, only one brand of furnace is bringing innovation to the HVAC world. Napoleon's Ultimate 9700 Series looks different because it is different.

REST EASY

CLEAN AIR TECHNOLOGY UVC AIR PURIFICATION

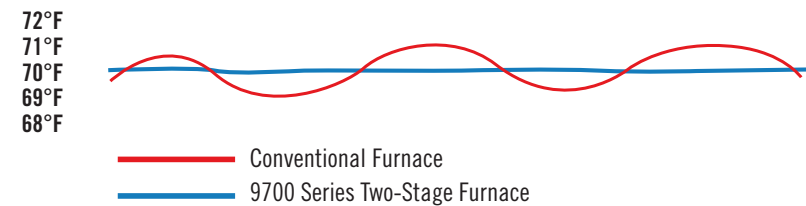

Napoleon's Ultimate 9700 Series features a UV-C air sanitization system uses Philips UV-C technology to keep your home's air at its best by eradicating airborne contaminants like viruses, bacteria, and mold. UV-C technology is another defense against threats like coronaviruses and cold & flu season.

ENERGY EFFICIENT TWO STAGE TECHNOLOGY

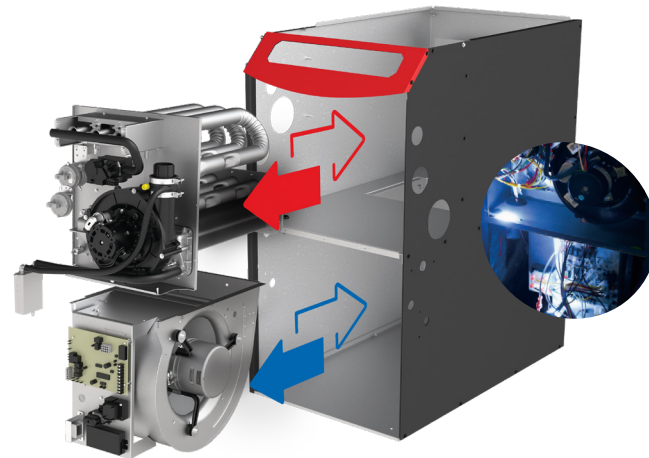

A two-stage furnace runs longer at lower capacity - 70% versus 100%. The system runs at 70% heating capacity on first stage for most of the year. This reduces electrical consumption of the blower motor as well as gas consumption, saving you money on utility bills.*

TWO-STAGE TECHNOLOGY DELIVERS EVEN CONSISTENT HEAT

MODULAR DESIGN WITH INTERIOR CABINET LIGHTS

Napoleon's innovative modular design allows for easy handling, and cleaning. With a removable heat exchanger and blower compartment, servicing a Napoleon furnace is a whole new experience with LED lights inside the furnace cabinet that automatically turn on when the front panels are removed.
